

SUGANTHA BALAN M

Full Stack Developer | UI/UX Designer

Sankarankovil, Tenkasi, Tamil Nadu | +91 63806 90663 | suganthabalanm3007@gmail.com

[LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Final-year B.Tech Information Technology student with hands-on experience across full-stack development, UI/UX design, and creative editing. Proven track record of 20+ value-added courses, 3 applied projects spanning web and AI-driven systems, and back-to-back hackathon wins delivering functional products under tight timelines. Skilled at translating design concepts into clean, responsive interfaces and pairing them with reliable back-end logic. Seeking to bring strong technical fundamentals, a design-first mindset, and a bias for shipping working products to a challenging role in software development or product design.

EDUCATION

B.Tech, Information Technology | *J.P. College of Engineering, Tenkasi* 2023 – 2027 (Expected)

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies, Artificial Intelligence.
- Active participant in department-level project expos and inter-college hackathons; consistently ranked among top project teams for technical execution and UI/UX quality.

PROJECTS

Habit X | *React.js, Node.js, MongoDB*

Full-stack habit-tracking web application

- Designed and built a modern habit-tracking platform enabling users to create routines, log daily progress, and stay accountable through streaks.
- Implemented streak tracking, progress visualization, and daily reminder logic to drive consistent user engagement.
- Built a responsive, component-based front end in React.js with a Node.js back end handling user data and reminder scheduling.
- Focused on an intuitive, distraction-free UX, applying UI/UX design principles from wireframe through final interface.

AI-Based Timetable Management System | *Python, AI/Optimization*

Automated academic scheduling engine

- Developed an AI-powered system that automatically generates optimized academic timetables for multiple classes and faculty.
- Designed optimization logic to minimize scheduling conflicts (faculty, room, and time-slot clashes) while efficiently allocating available resources.
- Structured the system to handle constraint-based inputs (subject load, faculty availability, room capacity) and output conflict-free schedules.
- Presented the project at Techathon 2026, where it was recognized with First Place for its innovative approach and technical implementation.

Library Management System | *Mobile App Development*

Mobile application for library operations

- Built a mobile application to manage books, member records, and issue/return transactions for a library.
- Implemented notification handling to alert members of due dates and administrative actions.
- Designed the admin-facing workflows for adding/removing books and monitoring circulation activity.

INTERNSHIPS & TRAINING

Data Analytics Intern | *Top Tech Developers, Chennai*

1 Month

- Worked on applied data analytics tasks as part of a structured internship program, gaining exposure to real-world data workflows.
- Collaborated with a team to analyze datasets and translate findings into actionable insights and reports.

MERN Stack Training | *Campus Connection*

10 Days

- Completed an intensive, hands-on training program covering React.js, Vite, and the full MERN stack.
- Built and deployed sample full-stack applications to reinforce front-end and back-end integration concepts.

AWARDS & ACHIEVEMENTS

APPATHON 2026 — 1st Place Winner | *SNS College of Technology*

- Secured First Place by developing an innovative application with excellent UI/UX and technical implementation, competing against multiple teams. Awarded ₹5,000 cash prize.

Techathon 2026 — 1st Place Winner | *IT Department Project Expo, J.P. College of Engineering*

- Won First Place for an innovative software solution, recognized for technical depth and presentation quality. Awarded ₹3,000 cash prize.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python (basics), HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Vite

Design: UI Design, UX Design, Graphic Design, Logo Design, Wireframing, Figma

Editing & Media: Video Editing, Photo Editing, Motion Graphics, Color Grading, Visual Storytelling

Tools & Platforms: Git, GitHub, VS Code, Zoho Creator

Core Concepts: Data Structures, OOP, Database Management, RESTful APIs, Responsive Web Design

VALUE-ADDED COURSES & CERTIFICATIONS

- Hands-on React JS Training — Campus Connection
- Android App Development — Vinsup Academy
- Android App Development — CADD Expert
- UI/UX Design MasterClass — NoviTech
- Zoho Creator Student Program — Zoho
- Figma MasterClass — NoviTech

ADDITIONAL INFORMATION

- Languages Known: English, Tamil
- Interests: UI/UX design trends, hackathons, video/photo editing, exploring emerging AI tools
- Strengths: Fast learner, strong design sense, comfortable working across the full stack, effective under hackathon time pressure
